Providing 40 Years of Penile Prosthesis Leadership

Since 1973, AMS has been a leader in providing penile prosthesis solutions. In 1973, the AMS® Cylinders were first introduced. The AMS 700™ Prosthesis followed in 1977, offering a single pump option for inflation and deflation. The AMS 700™ Prosthesis continued to evolve, with the introduction of the AMS 700™ Prosthesis with Plixi™ Pump in 2010. continues for you and your patients.

MORE THAN 100 COUNTRY

Continued innovations for you and your patients.
Dr. F. Brantley Scott was a surgeon, inventor, innovator, and co-founder of AMS. A native Texan, born in Pearsall in 1930, he received his medical degree at Yale University and completed his residency training at Baylor College of Medicine. He served the medical community as: Professor of Urology at Baylor; Chief of the Urology Service at the VA; Coordinator of the Urology Residency Program and Director of the Urodynamic Laboratory at St. Luke’s Episcopal Hospital.

During his 33 years as an urologist, Dr. Scott published over 100 articles and lectured in 37 States and 20 foreign countries.

Dr. Scott had many interests including: sculpting in clay, bronze and marble, painting, photography, poetry writing, coin collecting, fly-fishing, and bird watching.

Dr. Scott used his artistic talents and his surgical skills to address and solve urologic problems because he believed the solution to medical problems lay in innovative ideas. The artificial urinary sphincter and the inflatable penile prosthesis were just two of his inventions that improved patients’ lives.

His commitment to medical education has contributed significantly to the development of prosthetic urology and has had a lasting influence on the development of AMS.

This timeline highlights AMS’s innovative path of product development and enhancement, and is not indicative of country approval or availability.
